425-DIG.13

N° 6104 A.D. 1896

Date of Application, 19th Mar., 1896

Complete Specification Left, 1?th Dec., 1896—Accepted, 20th Feb., 1897

DUPLICATE

PROVISIONAL SPECIFICATION.

Improvements in the Means of Making Decorations of Paper, Linen, Cotton, Wool, Silk, and Jute Fabrics.

ALICE LIPSCOMBE Penlee Linkfield Street Redhill Surrey Spinster no occupation do hereby declare the nature of this invention to be as follows :—

To make paper or woven fabric decorations according to my invention I take a perforated plate of metal, wood, or other suitable material; or trellis work or netting made of wire, cane, or other suitable material, and I cover the same loosely on one side with the paper or woven fabric to be employed. I then push through the perforations, or trellis work, part of the material, so as to form a protuberance on the other side; the paper or woven fabric so protruded can then either be fixed if desired as then placed, or it can be cut into various shapes of flowers, fruits or other things, or I may use the perforated plate or trellis work to enable me to form the required protuberances of paper or fabric, and I may afterwards remove the whole for manipulating and cutting into various shapes and use it for decorations without the perforated or trellis supports.

Dated this 18th day of March 1896.

ALICE LIPSCOMBE.

COMPLETE SPECIFICATION.

Improvements in the Means of Making Decorations of Paper, Linen, Cotton, Wool, Silk, and Jute Fabrics.

ALICE LIPSCOMBE Penlee, Linkfield Street Redhill, Surrey, Spinster, do hereby declare the nature of this invention and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement :—

To make paper or woven fabric decorations according to my invention, I take a perforated plate made of metal, wood, or other suitable material, or trellis work, or netting made of wire, cord, cane, or other suitable material, and I cover the same loosely on one side with the paper or woven fabric to be employed for the decorations. I then push through the perforations in plates, or through the trellis work, or netting, part of the material, so as to form a protuberance on the other side; the paper or woven fabric so protruded, I then either fix as placed, or I may cut it into various shapes of flowers, fruits, or other things. As a variation of the above I may first cut the materials to be used in the decorations into the forms of petals of flowers, or leaves, or imitations of other things, and afterwards pass so much of them as may be required through the perforated plates, or trellis work, or netting, and then I fix them in position. I may also use the perforated plates, or trellis work, or netting, to enable me to form the required protuberances of paper or fabric, and I may afterwards remove them for

manipulating or cutting into various shapes, and use such for decorations without the perforated plates, or trellis work, or netting supports.

Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is ;

The combination of the various parts and materials, used to make this particular class of decorations, as herein fully set forth and described.

Dated this Eighteenth day of December 1896.

ALICE LIPSCOMBE.
